

AC Contactor for Motor Start and Protection

This AC contactor is used for motor start and protection. It is designed for electrical power transmission and distribution applications.

Overview

High-Performance AC Contactor

This AC contactor is engineered for reliable motor starting and circuit protection in industrial electrical systems. Designed with a 3-pole configuration, it supports a wide range of rated currents and coil voltages to accommodate diverse operational requirements. Its robust construction ensures consistent performance in power transmission and distribution applications.

Electrical Ratings

Available Rated Currents

- 9
- 12
- 18
- 25
- 32
- 40
- 50
- 65
- 80
- 95

Rated Voltage	690 V
Rated Frequency	50/60Hz

Technical Specifications

Pole Configuration	3P
Auxiliary Contact	11 (1NO + 1NC)
Coil Voltage Options	AC24V, AC36V, AC110V, AC220V, AC380V

Terminals

Terminal Identification

Terminal Type	Label
Power Input	1L1, 3L2, 5L3
Power Output	2T1, 4T2, 6T3
Auxiliary NO	13NO, 14NO, 22NO
Auxiliary NC	21NC
