

AC Electric Fan Motor

This AC motor is designed for use in electric fans and other home appliances. It features a durable metal housing with integrated mounting flanges and a threaded shaft.

Overview

Industrial-Grade Capacitor Motor

The EF80/82 series capacitor motor is a robust and efficient electric motor engineered for reliable performance in demanding industrial environments. Featuring a durable metal housing with integrated mounting flanges, it ensures secure installation and long service life. Its design includes a threaded shaft for seamless connection to various driven components, making it a versatile solution for professional applications.

Technical Specifications

Series Model	EF80/82
Motor Type	Capacitor Motor

Construction

Housing Material	Metal
Mounting Features	Integrated Flanges, Threaded Shaft
