Product Overview

High-Performance Magnetic Contactor

This 1.5-pole AC electric magnetic contactor is engineered for demanding air conditioning and refrigeration applications. It features robust construction to ensure reliable performance and extended service life in HVAC&R systems. With versatile voltage compatibility ranging from 24V to 277V, it serves as a dependable component for professional electrical installations.

Technical Specifications

Number of Poles	1.5
Coil Voltage	24 VAC
Frequency	50/60 Hz
Compliance Standards	IEC60947-4-1
