

AC Electric Motor

This AC electric motor is designed for general-purpose applications. It is characterized by its robust construction, reliable performance, and efficient operation, making it suitable for a wide range of industrial and commercial uses, including pumps, fans, compressors, and conveyors.

Product Overview

General Purpose Asynchronous Motors

The JY series asynchronous motors are engineered for versatile performance across a wide range of industrial and commercial applications. These units are built with a robust, durable housing that ensures protection against dust and moisture, making them suitable for demanding environments. Designed for continuous duty, they offer reliable operation for critical equipment such as pumps, fans, compressors, and conveyors.

Key Features

Performance Highlights

1 Continuous
Duty Cycle

Operational Characteristics

High Starting Torque, Low Noise Levels, Compact Design, Dust Resistant, Moisture Resistant

Applications

Common Applications

- Pumps
- Fans
- Compressors
- Conveyors
