

AC Electric Power and DC Welding Generator

This double-duty machine provides both AC electric power generation and DC welding capabilities. It is a versatile tool suitable for a variety of on-site needs.

Product Overview

Dual-Function Power Solution

This versatile double-duty machine is engineered to provide both AC electric power generation and DC welding capabilities in a single unit. Designed for efficiency and reliability, it serves as a critical tool for field operations requiring simultaneous or independent power and welding support. With options for both 1500rpm and 3000rpm configurations, it adapts to various operational demands.

Technical Specifications

Available Models

- D250 (1500rpm)
- D300 (1500rpm)
- D400 (1500rpm)
- D300 (3000rpm)

Machine Type	AC Generating Electricity & DC Welding Double-Duty Machine
Operational Speeds	1500 rpm, 3000 rpm
