

AC High-Efficiency LED Bulb

This high-efficiency AC LED bulb is designed for general lighting applications. It provides bright, uniform illumination and offers significant energy savings compared to traditional bulbs.

Product Overview

High-Efficiency Lighting Solution

This high-efficiency AC LED bulb is engineered for consistent, bright, and uniform illumination across both residential and commercial environments. Designed for energy efficiency, it offers significant power savings compared to traditional incandescent lighting options. Its durable construction ensures a long service life, effectively reducing maintenance frequency and operational costs for professional buyers.

Technical Specifications

Lighting Characteristics

- High energy efficiency
- Uniform light distribution
- Durable construction

Power Compatibility

Standard AC power outlets

Compliance and Application

Suitable Applications

Residential, Commercial, General Lighting
