

AC Motor for Exhaust Fans

This motor is designed for use in exhaust fans. It operates on a rated voltage of 100/220V AC.

Product Overview

High-Performance Exhaust Fan Motor

The FR-600A is a specialized motor engineered specifically for exhaust fan applications. Designed for reliability and consistent ventilation performance, this unit supports dual voltage operation to accommodate various electrical environments. It is an ideal component for professional ventilation systems requiring durable, long-term operation.

Technical Specifications

Primary Application

Exhaust Fans • Ventilation Systems

Model Number	FR-600A
Rated Voltage	100/220V AC
