

AC Motor Run Capacitor

This round capacitor is designed for AC motor running applications. It has a capacitance of 50MFD and is rated for 370 or 440VAC.

Product Overview

High-Performance CBB65 Motor Run Capacitor

The CBB65 AC motor run capacitor is engineered for the reliable starting and operation of single-phase AC motors running at 50/60Hz frequencies. Ideal for applications in air conditioners, refrigerators, and compressors, this unit features a robust aluminum case with an anti-explosion design for enhanced safety. Its self-healing properties and ricinus oil filling ensure high stability, excellent heat dissipation, and a long operational lifespan.

Technical Specifications

Capacitance	50 MFD
Voltage Rating	370VAC, 440VAC
Frequency	50/60Hz
Model Number	SE-CAP-50/440R

Safety & Construction

Construction Features

- Aluminum case
- Anti-explosion design
- Ricinus oil filled
- Non-PCB construction

Safety Certifications

CE • 10,000 AFC Protected
