

# AC Rolling Door Motor

This AC rolling door motor is designed to operate rolling doors up to 300kg. It features a robust motor unit with an integrated control box and a chain drive system for efficient operation.

## Product Overview

### Professional Rolling Door Automation

This high-performance AC rolling door motor is engineered for reliable operation in both commercial and industrial environments. Designed to support heavy-duty rolling shutters up to 300kgs, the system includes a robust drive mechanism and integrated safety features. The unit is compatible with advanced control systems and optional UPS reserve power to ensure continuous operation during power fluctuations.

## Technical Specifications

### Max Lifting Capacity

**300 kgs**  
Capacity

### Certifications

CE, CCC

## Product Compatibility

### Compatible Door Systems

- Automatic Rolling Shutter Doors
- Electric Sliding Doors
- Electric Swing Doors

## Features

### System Capabilities

Remote Control • UPS Support • Integrated Control Box • Chain Drive System
