Product Overview

High-Performance Coffee Grinder Motor

This AC universal motor is specifically engineered for coffee grinders and small kitchen appliances, prioritizing consistent grinding performance and reliability. Featuring robust construction with copper windings, it ensures efficient power transfer and long-lasting durability for demanding daily use. Its compact design allows for seamless integration into various appliance models, making it an ideal power source for professional and home coffee preparation equipment.

Technical Specifications

Application Suitability

- Coffee Grinders
- Small Kitchen Appliances

Motor Type

AC Universal Motor

Construction Materials

Copper Windings, Durable Brushes, Reliable Commutator

Performance Features

Performance Highlights

1 High

Power Transfer Efficiency

1 Optimized

Operational Consistency
