

AC/DC Arc Welder ZXE1-500

The ZXE1-500 is a versatile AC/DC arc welder designed for diverse welding tasks. It features dual current meters to precisely monitor AC and DC current during operation.

Overview

Professional Dual-Mode Arc Welder

The ZXE1-500 is a versatile AC/DC arc welder engineered for high-performance welding applications. It offers precise control through integrated dual current meters and a user-friendly large adjustment knob. Designed for industrial utility, the unit features a rugged mobile base with wheels and top-mounted lifting rings for enhanced job-site portability.

Performance Metrics

Core Metrics

500 A

Rated Output Capacity

Technical Features

Supported Operating Modes	AC Arc Welding, DC Arc Welding
Current Monitoring	Dual analog current meters for independent AC and DC monitoring

Physical Attributes

Portability and Handling

- Wheeled base for floor mobility
- Top-mounted heavy-duty lifting rings

Construction

Robust Design • Industrial Grade
