

AC/DC Power Welder

This AC/DC power welder is a versatile machine suitable for both AC and DC welding processes. It features adjustable power settings that enable precise control over the welding arc.

Product Overview

Versatile AC/DC Welding Solution

The 280AC/DC welder is a professional-grade machine engineered to handle both AC and DC welding processes with precision. Designed for flexibility and ease of use, it features highly adjustable power settings to ensure optimal control over the welding arc for a variety of applications. Its robust design includes integrated wheels and a handle, making it a highly portable and reliable choice for demanding work environments.

Technical Specifications

Portability

- Integrated handle
- Mobility wheels

Model	280AC/DC
Supported Modes	AC, DC

Control & Interface

Control Features

Adjustable Power • Precise Arc Control • Front Panel Indicators
