

AC/DC TIG Welding Machine

This AC/DC TIG welding machine is designed for diverse welding applications. It features adjustable parameters for precise control over the welding process and supports both AC and DC welding modes.

Product Overview

Versatile AC/DC Welding Solution

The WSME-200 is a high-performance AC/DC TIG welding machine engineered for professional-grade versatility. It allows for seamless switching between AC and DC modes, making it an ideal choice for welding aluminum, steel, and stainless steel with precision. The compact, portable architecture ensures excellent mobility for job sites, while built-in safety mechanisms protect against overheating and overcurrent.

Technical Specifications

Compatible Materials

- Aluminum
- Steel
- Stainless Steel

Key Performance Metrics

200 A

Current Output

Supported Modes

AC TIG, DC TIG

Safety & Features

Safety Features

Overcurrent Protection • Overheating Protection

Operational Controls

User-friendly interface with clear digital display for adjustable parameter control
