

## AC/DC TIG/MMA Inverter Welder

This versatile inverter welder supports TIG and MMA welding processes with both AC and DC TIG functionality. It is ideal for welding carbon steel, stainless steel, copper, and non-ferrous metals.

### Overview

#### Professional AC/DC Inverter Welder

This versatile inverter welder is engineered for both TIG (Tungsten Inert Gas) and MMA (Manual Metal Arc) welding processes. Supporting both AC and DC TIG welding, it is capable of handling a wide variety of metals, including aluminum and steel. Designed for industrial applications, it offers precise control over welding parameters to ensure high-quality results.

### Technical Specifications

Supported Processes	TIG AC, TIG DC, MMA
Model Identifier	TIG315PACDC(R63)

### Control Features

#### Adjustable Welding Parameters

- Pre-flow time
- Peak current
- Basic current
- Down slope
- Arc force
- Pulse frequency
- Pulse duty
- Clean area width
- Gas after flow

### Connectivity

#### Cooling System Compatibility

Gas Cooling • Water Cooling
