

Acetic Cure Silicone Sealant

High-performance, acetic cure silicone sealant designed for a wide range of applications. It cures to form a tough, elastic rubber that remains flexible over time.

Product Overview

High-Performance Acetic Cure Silicone Sealant

This high-performance acetic cure silicone sealant is engineered for a wide range of professional applications, providing a flexible and durable seal that withstands weathering, moisture, and temperature extremes. It is an ideal solution for sealing joints and gaps in construction, automotive, and marine environments. The formula offers excellent adhesion to glass, metal, ceramics, and most plastics, curing into a tough, elastic rubber that maintains flexibility over time.

Technical Specifications

Volume	280 ml
Curing Type	Acetic Cure

Application & Compatibility

Application Areas

- Construction
- Automotive
- Marine

Compatible Materials	Glass, Metal, Ceramics, Plastics
----------------------	----------------------------------

Performance Features

Key Performance Attributes

Weather Resistant • Moisture Resistant • Temperature Resistant • Flexible Seal • Durable
