

# Active Speaker System with Bluetooth Connectivity

This active speaker system is designed for versatile audio applications. It features wireless connectivity via Bluetooth, allowing seamless streaming from smartphones and other compatible devices.

## Overview

### Professional Active Speaker System

This versatile active speaker system is designed for high-quality audio reproduction in various professional environments. Featuring seamless Bluetooth connectivity, it allows for easy wireless streaming from smartphones and other compatible devices. The system offers precise control over sound output with adjustable treble, bass, and volume settings, ensuring optimal performance for any application.

## Technical Specifications

Frequency Range	20Hz - 20kHz
Acoustic Pressure	90 dB
Speaker Output Impedance	6-8 ohms

## Power & Connectivity

Power Input	AC 220V/50Hz
Connectivity	Bluetooth, AUX Input, RCA

## Controls & Features

### Audio Controls

- Volume Control
- Treble Adjustment
- Bass Adjustment

### Installation

Wall Mountable • Compact Design

## Key Metrics

### Performance Highlights

<b>90 dB</b> Acoustic Pressure	<b>20 kHz</b> Max Frequency
