

# Active UHF/VHF/FM Antenna with Power Adapter

This active antenna is designed for receiving UHF/VHF/FM signals. It enhances signal reception for improved television and radio performance.

## Overview

### High-Performance Signal Reception

This active antenna is engineered to optimize UHF, VHF, and FM signal reception for television and radio applications. Equipped with an integrated power adapter for signal amplification, it ensures clear and stable broadcast quality. It serves as an ideal solution for environments with weak signal strength, providing reliable access to over-the-air content.

## Technical Specifications

Signal Compatibility	UHF, VHF, FM
Antenna Type	Active
Power Source	Included Power Adapter
Model Identifier	EM-900
