

AD56-16 Series Green Indicator Light

The AD56-16 series indicator lights are designed for various indication purposes. These indicator lights are suitable for AC 380V applications and feature a compact design with a green lens for clear visibility.

Overview

Industrial Indicator Solution

The AD56-16 series indicator lights, including models 16D and DS, are engineered for reliable visual status indication in demanding industrial environments. Featuring a compact design and a high-visibility green lens, these units are ideal for integration into control panels and machinery. They are specifically built to withstand industrial conditions, ensuring consistent performance for your equipment.

Technical Specifications

Rated Voltage

380 V

Rated Voltage

Available Models	AD56-16D, AD56-16DS
Lens Color	Green
Mounting Diameter	16 mm

Applications

Common Applications

- Control Panels
- Industrial Machinery
- Status Indication Systems
