

AD56-16 Series Indicator Light

The AD56-16 series indicator lights are efficient signaling devices designed for diverse applications. These lights offer clear visual indication for operational status and are available in multiple colors.

Overview

Compact Industrial Signaling

The AD56-16 series indicator lights are compact and efficient signaling devices designed for reliable performance in industrial environments. Engineered for easy installation, these lights provide clear visual status indication for control panels, machinery, and critical equipment. The series includes both 16C and 16CS models to accommodate various mounting and connection requirements.

Technical Specifications

Available Models

- 16C
- 16CS

Operating Voltage	220 V
Current Type	AC
Mounting Diameter	16 mm

Compliance & Standards

Safety Compliance

CE Certified

Certifications	CE
