

AD56-22 Standard Form Indicator Lamp

The AD56-22 series indicator lamp is a standard form indicator light designed for various applications. It features a $\varnothing 22/25$ mm diameter and is classified as a C type indicator light.

Product Overview

Professional Visual Indication

The AD56-22 series is a standard-form indicator lamp engineered for high-visibility signaling in diverse industrial settings. Designed for a 22mm or 25mm mounting diameter, this unit ensures reliable performance in critical applications such as emergency and security lighting systems. Its C-type construction provides a consistent visual status output for modern control panels.

Technical Specifications

Mounting Diameter

22 mm

Min Diameter

25 mm

Max Diameter

Type Classification

C Type

Series	AD56-22
Rated Voltage	AC 220V
Operating Current	20 mA

Applications

Recommended Use Cases

- Emergency lighting systems
- Security lighting
- General industrial control panels
