

Adaptive Tricycle with Swivel Seat and Basket

This adaptive tricycle is designed for comfort and convenience, featuring a swivel seat for easy access and a rear basket for carrying items. The tricycle has a sturdy frame providing stability and durability, and it is ideal for individuals with balance or mobility challenges who want to enjoy outdoor activities.

Product Overview

Designed for Comfort and Mobility

This adaptive tricycle is specifically engineered for individuals seeking enhanced stability and ease of movement during outdoor activities. Featuring a convenient swivel seat and a low step-through frame, it ensures effortless access for users with mobility challenges. The inclusion of a rear differential and integrated storage baskets combines functional durability with practical everyday utility.

Design and Ergonomics

Seating System	Swivel mechanism, Back support
Frame Design	Low step-through frame for easy mounting
