Product Overview

Professional Rodent Control

These thickened rodent glue boards provide a highly effective solution for managing mouse and rat populations in various environments. Designed with a convenient foldable book style, the traps are easy to position and operate for both commercial and residential use. The high-capture adhesive ensures that rodents are securely caught, offering a reliable, non-toxic method for pest control.

Thickened Board, Foldable Book Style, High Capture Rate, Non-toxic

Usage Guidelines

Deployment Recommendations

- Place in areas with known rodent activity.
- Position close against walls for optimal results.
- Keep away from reach of children and pets.
- Use detergent to remove adhesive from fabrics if accidental contact occurs.
