

Adipic Dihydrazide Crosslinking Agent

This high-purity adipic dihydrazide is suitable as a crosslinking agent in waterborne coatings, adhesives, and sealants. It enhances the mechanical properties, chemical resistance, and thermal stability of the final product.

Product Overview

High-Purity Crosslinking Agent

Adipic Dihydrazide is a high-purity crosslinking agent specifically designed for waterborne coatings, adhesives, and sealants. This fine white powder enhances mechanical properties, chemical resistance, and thermal stability in finished industrial products. Additionally, it serves as an effective scavenger for carbonyl compounds, ensuring consistent performance in demanding applications.

Key Features

Performance Benefits

Mechanical Property Enhancement, Chemical Resistance, Thermal Stability, Carbonyl Scavenging

Technical Specifications

Product Code

ZYC-08

Physical Form

Fine white powder

Applications

Primary Applications

- Waterborne coatings
- Adhesives
- Sealants
- Carbonyl compound scavenging

Quality Control

Quality Control Parameters

High Purity • Batch Tested • Industrial Grade
