

Adjustable Air Conditioner Diffuser Grille

This air conditioner diffuser grille features adjustable vanes for controlling airflow. Constructed from durable plastic, it improves air circulation and prevents drafts in residential and commercial environments.

Product Overview

Efficient Air Distribution Solution

This adjustable air conditioner diffuser grille is designed to provide optimal airflow distribution in both residential and commercial environments. Featuring a series of adjustable vanes, it allows users to precisely control the direction and intensity of air to prevent drafts and improve circulation. Constructed from durable, wear-resistant plastic, this grille ensures long-lasting performance and easy installation across various AC models.

Key Features

Core Benefits

- Adjustable vanes for directional airflow control
- Durable plastic construction for wear resistance
- Universal compatibility with multiple AC models
- Enhances indoor comfort by preventing direct drafts
- Easy installation process

Technical Specifications

Functionality

Adjustable Vanes • Air Distribution • Draft Prevention

Material	Durable Plastic
Color	Black
Applications	Residential, Commercial, HVAC Systems
