

Adjustable Aluminum Set Square

This precision-engineered set square is designed for accurate angle measurements and marking. Constructed from durable aluminum alloy, it features laser-etched graduations for high visibility and long-lasting accuracy.

Product Overview

Precision Adjustable Set Square

This precision-engineered adjustable set square is designed for accurate angle measurements and marking in professional environments. Constructed from durable aluminum alloy, it features laser-etched graduations that ensure high visibility and long-lasting accuracy. The integrated swiveling head allows for versatile angle adjustments, making it an essential tool for precise angle transfers and layout work in woodworking, metalworking, and construction.

Physical Properties

Material	Aluminum alloy
Key Features	Swiveling Head, Laser-Etched Graduations, Adjustable Angle, High Visibility

Applications

Recommended Industries

- Woodworking
- Metalworking
- Construction
