

Adjustable Angle Finder with Spirit Level

This adjustable bevel is used for marking angles. It features a pivoting blade that locks at any desired angle and a built-in spirit level for accurate alignment.

Product Overview

Precision Angle Measurement

This adjustable angle finder, also known as a sliding bevel or T-bevel, is an essential tool for marking and transferring precise angles. Featuring a durable stainless steel blade and a high-visibility ABS handle, it is designed for long-term reliability in workshop environments. The integrated spirit level allows for quick and accurate alignment checks, making it a versatile addition to any professional toolkit.

Technical Specifications
