

Adjustable Axial Ventilator with Aluminum Alloy Blades

This axial ventilator is designed for efficient air circulation in industrial and commercial settings. Its adjustable design allows for customized airflow direction, and it features aluminum alloy blades and a galvanized steel body.

Product Overview

High-Performance Industrial Ventilation

This 300mm dual-purpose axial ventilator is engineered for demanding industrial environments, featuring a robust die-cast aluminum alloy blade and motor construction for durability and low noise operation. Designed with a versatile 'Model U' stand, it allows for elevation adjustment up to 145 degrees, providing precise control over airflow direction. Its strong suction capability and lightweight design make it an essential tool for air circulation in confined spaces, construction sites, and chemical laboratories.

Technical Specifications

Size	300 mm
Voltage	220V-240V
Frequency	50 Hz
Elevation Adjustment	145 degrees
Color	Yellow

Materials & Construction

Material Breakdown

Component	Material
Motor	Aluminum Alloy
Blade	Die-cast Aluminum Alloy
Body	Galvanized Steel

Usage & Applications

Ideal Use Cases	Manhole Ventilation, Tunnel Ventilation, Tank Maintenance, Ship Building, Underground Projects, Welding, Chemical Labs
-----------------	--

Logistics & Ordering

Minimum Order Quantity	50
Delivery Time	20 days after payment
Packaging	Neutral Carton Packing, 1pc/ctn
