Product Overview

Precision Slitting Solution

This compact slitting machine is engineered for the precise and efficient cutting of sheet metal and similar materials. Featuring adjustable settings for material thickness and cutting width, it provides consistent, high-quality results while minimizing material waste. Its robust frame and automated motor make it an ideal choice for small to medium-scale production environments and prototyping.

Technical Capabilities

Cutting Features

Adjustable Blade, Automated Slitting, Precision Cutting, Sheet Metal Compatible

Service & Support

Support Services

- 24/7 Pre-sales and After-sales consultation
- Technical guidance and suggestions
- One-year warranty period
- Spare parts supply at cost price post-warranty
- Long-term technical assistance

Quality Compliance

ISO 9001 Certified • Pre-shipment Tested

Purchase Information

Payment Terms

- 30% Deposit via T/T
- 70% Balance via T/T before delivery
- Irrevocable LC at sight accepted

Typical Lead Time

65 days
