

# Adjustable Carbon Steel Clevis Hanger

This U-shaped support bracket suspends pipes and conduits from overhead structures. It is made of carbon steel, featuring two arms that wrap around the pipe and are secured by a crossbolt or clevis pin.

## Product Overview

### Adjustable Carbon Steel Clevis Hanger

The Adjustable Carbon Steel Clevis Hanger is a reliable U-shaped support bracket designed for the suspension of pipes, conduits, and various cylindrical objects from overhead structures. Engineered to facilitate thermal expansion and contraction, this hanger ensures piping systems maintain proper alignment under operational stress. Its robust construction provides a secure, adjustable mounting solution suitable for professional industrial and commercial piping applications.

## Technical Specifications

### Primary Application

- Pipe suspension
- Conduit support
- Cylindrical object mounting

Material	Carbon Steel
Compliance	MSS SP-58
Design Type	Clevis Hanger (U-shaped)
