

Adjustable Clevis Hanger for Pipe Support

This clevis hanger is designed to suspend stationary non-insulated pipe lines. Its two-piece design allows easy installation and vertical adjustment.

Product Overview

Versatile Pipe Support Solution

The Adjustable Clevis Hanger is a robust component engineered for suspending stationary, non-insulated pipe lines in various industrial applications. Featuring a two-piece design, this hanger allows for straightforward installation and precise vertical adjustment to ensure optimal pipe alignment. Its U-shaped clevis cradles the pipe securely, while the yoke or strap mechanism provides stable attachment to supporting structures, making it a reliable choice for diverse piping systems.

Technical Specifications

Construction Features

- U-shaped clevis
- Yoke or strap attachment
- Bolt or pin secured

Design Configuration	Two-piece adjustable clevis hanger
Application	Stationary non-insulated pipe lines
Adjustment Mechanism	Yes

Compliance & Availability

Available Variations	Various Sizes, Various Materials
