

Adjustable Color Temperature LED Bulb

This LED bulb offers adjustable color temperature via remote control. It features an E27 screw base and aluminum body for heat dissipation, with settings for cool, neutral, and warm white light.

Product Overview

Versatile Lighting Solution

This adjustable color temperature LED bulb offers flexible lighting options for various environments. Designed with a standard E27 base, it is easy to install in existing fixtures. Users can seamlessly switch between cool white, neutral white, and warm white light, while the included remote control allows for convenient dimming and on/off switching.
