

# Adjustable Current Circuit Breaker

This circuit breaker features adjustable current settings for customized protection. It is designed for electrical safety and effective circuit protection in diverse applications.

## Product Overview

### High-Performance Adjustable Circuit Protection

This adjustable current circuit breaker is designed for versatile electrical safety and circuit protection across various industrial and commercial applications. It features multi-pole configurations with phase protection and offers flexible current settings to meet specific load requirements. Built to comply with international standards, it ensures reliable performance in managing leakage current and preventing electrical faults.

## Key Performance Metrics

### Key Performance Metrics

**6 kA**

Breaking Capacity

**400 V**

Rated Voltage

**500 mA**

Max Leakage Current

## Technical Specifications

### Rated Voltage (AC)

- 230V / 400V
- 250V / 440V

### Breaking Capacity Options

6KA, 8KA

## Current Settings

### Rated Current Frame Classes

Frame Class Range	Adjustable Settings
5-15A	5, 10, 15A
10-30A	10, 15, 20, 25, 30A
15-45A	15, 30, 45A
30-60A	30, 45, 60A

## Leakage Protection

### Leakage Acting Current (I<sub>Δn</sub>)

- 300mA
- 500mA

### Rated Non-operating Current (I<sub>no</sub>)

- 150mA
- 250mA

## Standards & Compliance

### International Standards

IEC60947-2 • NFC61450 • NFC62411 • IEC61009

## Product Features

Configuration	4 poles, 3 phases protected
Safety Features	Differential Protection, Phase Protection, Adjustable Current, Test Function
