

# Adjustable Document Camera

This document camera features a sleek, adjustable design with a top-mounted camera unit. It is a versatile tool for capturing and displaying documents, objects, and other visual materials.

## ADDITIONAL IMAGES

## Overview

### High-Performance A3 Document Capture

This 15.0 Mega Pixel document camera is designed for high-speed professional scanning, capable of capturing A3-sized documents in just one second. Equipped with a high-power 360-degree LED supplement light and advanced autofocus, it ensures crystal-clear image quality even in low-light environments. Its versatile functionality includes multi-standard barcode recognition and OCR support for over 180 languages, making it an essential tool for efficient office digitization.
