

Adjustable Eyeball MR16 12V Downlight

These adjustable MR16 downlights are designed for 12V power systems. The eyeball design allows for directional lighting adjustments.

Product Overview

Adjustable Eyeball MR16 12V Downlight

This adjustable eyeball downlight is specifically engineered for 12V low-voltage lighting systems. Featuring a versatile eyeball design, it allows for precise directional adjustments to highlight specific areas or objects. It is an ideal solution for B2B applications requiring flexible and focused illumination in commercial or residential settings.
