

# Adjustable Flow Nozzle with Pistol Grip

This industrial nozzle features adjustable flow settings for versatile applications. It is equipped with both a pistol grip and an overhead handle to improve control and maneuverability.

## Overview

### Professional Firefighting Solution

This adjustable flow nozzle is engineered for high-performance firefighting across various environments. It features a robust pistol grip and an additional overhead handle to ensure maximum control and maneuverability during critical operations. The rotating nozzle head allows for precise flow rate adjustments, making it a versatile tool for industrial safety and emergency response teams.

## Key Features

### Key Features

- Adjustable flow rate via rotating nozzle head
- Ergonomic pistol grip handle for steady operation
- Integrated overhead handle for enhanced maneuverability
- Durable industrial-grade construction
- Versatile application for various fire types

## Technical Specifications

### Primary Application

Fire Fighting • Industrial Safety • Emergency Response

### Model Identifier

1001 AT6.0C-500

## Design & Ergonomics

### Control Mechanisms

Pistol Grip, Overhead Handle, Rotating Head
