

Adjustable Gas Pressure Regulator

This adjustable gas pressure regulator is designed for propane or similar gas systems. It features a handwheel for pressure adjustment and a lever for on/off control.

Product Overview

Professional Gas Regulation Solution

This adjustable gas pressure regulator is engineered for reliable performance in propane and LPG systems. Designed for versatility, it features a user-friendly handwheel for precise pressure adjustment and an integrated lever for convenient on/off control. Built with durable materials, this unit is suitable for outdoor environments, ensuring consistent gas flow, safety, and efficiency for various professional applications.

Technical Specifications

Compatible Gas Types

LPG • Propane

Control Mechanisms

- Manual handwheel for pressure adjustment
- Lever-operated on/off control

Available Pressure Ranges

Low Pressure, Medium Pressure, High Pressure

Compliance & Reach
