

Adjustable Glass Suction Plate

This suction plate is designed for use on flat or spherical surfaces of glass and marble. It provides a secure hold for lifting and positioning.

Product Overview

Professional Glass Handling Solutions

These adjustable suction plates are engineered for the secure handling of glass, marble, and other smooth, non-porous surfaces. Available in two and three-cup configurations, these tools provide reliable suction power for professional installation and transport tasks. Designed for durability and ease of use, they ensure stable grip on both flat and spherical surfaces.

Performance Metrics

Maximum Suction Capacity

150 kg

Model BX3-H (3-Cup)

100 kg

Model BX2-H (2-Cup)
