

Adjustable Head Transmission Jack

This professional lifting transmission jack features an adjustable head that can be tilted for alignment. It is equipped with steel wheels, swivel casters, and a load-restraining chain for safety.

Product Overview

Professional Transmission Lifting Solution

This professional-grade transmission jack is engineered for optimum alignment of transmission bolt patterns and pins, featuring a versatile head that tilts forward, backward, and side-to-side. Designed with rugged steel wheels and full swivel ball-bearing casters, it allows for easy movement and precise positioning within the workshop. Safety is prioritized through integrated multi-adjustment knobs and a secure load-restraining chain for reliable lifting and lowering operations.

Key Features

Safety and Mobility

Tilting Head, Load-restraining Chain, Swivel Casters, Steel Wheels
