

Adjustable Height Air Circulator Fan

This air circulator fan provides powerful air circulation. It features adjustable tilt, oscillation, and height for optimal air distribution.

Product Overview

Professional Air Circulation

The SK-DL20-3C air circulator fan is engineered to deliver efficient and powerful airflow across various indoor environments, from offices to residential spaces. Its design features a versatile spherical head mounted on a telescopic pole, allowing for precise height adjustment and targeted air distribution. With intuitive controls for speed and timing, this unit balances high performance with user-friendly operation.

Design & Build

Color Scheme

White Housing • Black Fan Blade

Key Design Features

Telescopic Pole, Adjustable Tilt, Oscillating Head, Spherical Housing

Control & Operation

Control Functions

- Power Control
- Speed Settings
- Timer Functions

Usage

Ideal Applications

- Home
- Office
- General Indoor Spaces
