

Adjustable Height Air Circulator Fan

This air circulator fan is designed for efficient air movement. Its adjustable height stand and spherical fan head help distribute air evenly throughout a room.

Overview

High-Efficiency Air Circulation

The SK-DL20-3B is a versatile air circulator fan engineered to optimize airflow and temperature distribution in any room. Featuring an adjustable height stand and a precision-engineered spherical head, it effectively moves air to eliminate stagnant spots. Its clean, modern design with a white finish and black accents makes it a suitable addition to professional or residential environments.
