

Adjustable Height Baby Walker with Activity Center

This baby walker has a sturdy frame and multi-directional wheels for mobility. It features a padded seat, an activity center with toys, and adjustable height settings.

Product Overview

Designed for Development and Safety

This adjustable height baby walker provides a secure and stimulating environment for infants learning to walk. Featuring a sturdy frame and multi-directional wheels, it ensures smooth and safe mobility across various floor surfaces. The integrated activity center offers engaging toys to support developmental milestones, while the padded seat guarantees comfort during extended playtime.
