

Adjustable Height Electric Space Heater

This freestanding electric space heater is designed for indoor use. It features an adjustable height stand with a circular base and a metallic reflector to maximize heat projection.

Product Overview

Versatile Indoor Climate Control

This freestanding electric space heater is designed for efficient localized heating in various indoor environments, including homes and offices. It features an adjustable height stand to target warmth exactly where it is needed most, while the stable circular base ensures safe operation. Equipped with a high-performance metallic reflector, it optimizes heat projection to maintain a comfortable temperature in enclosed spaces.
