

Adjustable Height Metal Garment Rack with Casters

This garment rack is constructed from durable metal tubing and equipped with smooth-rolling casters for mobility. The height can be adjusted to accommodate different garment lengths, making it ideal for retail and storage.

Product Overview

Professional Garment Organization

This heavy-duty garment rack is engineered for durability and versatility in demanding environments. Constructed from robust metal tubing, it provides a reliable solution for retail displays, storage facilities, and clothing collection management. The integrated smooth-rolling casters ensure effortless mobility, while the adjustable height mechanism allows for seamless adaptation to various garment lengths.
