

# Adjustable Height Oscillating Stand Fan

This stand fan features adjustable height and an oscillating head for broad air distribution. It has three wind settings, a 45cm diameter grill, and a copper motor with thermal overload protection.

## Product Overview

### Professional Air Circulation Solution

This adjustable height oscillating stand fan provides efficient and reliable air circulation for professional environments, offices, and living spaces. Engineered for quiet performance, it features multiple speed settings and a flexible design that ensures customizable comfort for any user. The robust construction and stable base make it a practical and durable choice for maintaining optimal airflow.

## Key Features

### Performance Highlights

**3 levels**  
Speed Settings

**1 degree**  
Oscillation

### Operational Capabilities

- Adjustable height for customizable airflow
- Oscillating function for even air distribution
- Quiet operation technology
- Stable base for safety and reliability

## Certifications & Usage

### Ideal Environments

Office, Residential, Living Room, Bedroom
