

Adjustable Height Parabolic Space Heater

This space heater uses a parabolic reflector to focus heat for efficient warming. It has adjustable height and oscillation, with multiple power settings and a safety tip-over switch.

Product Overview

Efficient Targeted Heating

This parabolic space heater is engineered for efficient, targeted warmth, utilizing a specialized reflector design to focus heat exactly where it is needed. Designed for versatility and user comfort, it features adjustable height and oscillation capabilities to suit various room layouts. Built with durable materials, it incorporates essential safety features like a tip-over switch, making it a reliable solution for professional or commercial environments.

Key Features

Core Features

- Parabolic reflector for focused heat
- Adjustable height
- Oscillation function
- Multiple power settings
- Tip-over safety switch
