Product Overview

Professional Air Circulation Solution

This high-performance pedestal fan is engineered for efficient cooling in commercial and residential environments. Featuring a streamlined aluminum blade design and a robust cold-rolled silicon steel motor, it delivers powerful airflow with minimal noise. Built for durability and safety, the unit includes a resettable thermal protector and a stable, heavy-duty base, making it an ideal choice for offices, hotels, restaurants, and industrial spaces.

Performance & Motor

Motor Construction	Cold-rolled silicon steel sheet with copper enameled wire
Continuous Runtime	5000 hours
Speed Settings	3
Thermal Protection	Yes

Design & Build

Blade Material	Aluminum
Oscillation Type	Metal gear micro motor
Adjustable Features	Height Adjustable, Pitching Angle Adjustable, Oscillation

Applications

Suitable Environments

- Offices
- Hotels
- Restaurants
- Stores
- Residential
- Warehouses
- Factories
