

Adjustable Height Pedestal Fan

This adjustable height pedestal fan is designed for ventilation and exhaust. The fan unit features a protective grille and a metal stand with a U-shaped base for stability.

Product Overview

Professional Ventilation Solution

This adjustable height pedestal fan is engineered for versatile air circulation and ventilation in indoor environments. Featuring a robust square fan housing and a stable U-shaped base, it provides reliable airflow control for various industrial or commercial settings. The height-adjustable stand allows for precise positioning, ensuring optimal performance for exhaust or cooling applications.

Key Features

Design Highlights

Height Adjustable, Stable U-Base, Protective Grille, Square Housing

Technical Specifications

Application

Indoor Use • Ventilation • Exhaust

Construction Material

Metal

Base Design

U-shaped metal tubing
