

Adjustable Height Pedestal Fan with Multi-Blade Design

This is an adjustable height pedestal fan designed for circulating air in a room. It features a multi-blade design enclosed within a safety grill.

Product Overview

Professional Cooling Solution

This adjustable height pedestal fan features a high-performance multi-blade design engineered for optimal airflow. Built with a sturdy circular base and a telescopic pole, it offers versatile height adjustment to suit various workspace requirements. The integrated safety grill and centrally located control panel ensure both user safety and ease of operation in professional environments.
