

Adjustable Height Pedestal Fan with Timer

This pedestal fan provides adjustable cooling with three wind settings and a timer up to 7.5 hours. It features an oscillating head and adjustable height for customized air distribution.

Product Overview

Professional Air Circulation

This adjustable height pedestal fan is engineered for effective indoor air distribution in commercial and office environments. Featuring a multi-speed motor and oscillation functionality, it provides versatile cooling options to suit varying needs. Its weighted circular base ensures high stability, while the adjustable pole allows for precise height customization to optimize airflow reach.

Technical Features

Oscillation	Yes
Control Options	Multi-speed Motor, Adjustable Height, Integrated Timer

Design and Build

Safety Standards Protective wire cage	
Base Design	Weighted circular base
Application	Indoor use
