

Adjustable Height Pedestal Fan with Wire Cage

This electrical fan is designed as a freestanding unit. It features a circular fan head with three blades enclosed in a wire cage, along with an adjustable height pole and a stable base.

Product Overview

Professional Air Circulation Solution

This adjustable height pedestal fan is engineered for effective indoor air circulation and cooling in commercial or workspace environments. Featuring a robust wire cage design and a stable, flat base, it combines safety with reliable performance. The unit includes an integrated control panel with intuitive buttons and a knob for precise airflow management, making it an ideal choice for maintaining comfortable conditions in offices, warehouses, or workshops.
